

## ES PROMOTIONS RISK ASSESSMENT

**Risk Assessment of: Hop Scotch**

 Risk	 Existing Controls	Likelihood 1 - 5	Severity 1 - 5	Risk Score L x S	 Further Action to Take
Over Enthusiastic Participants	If the hop scotch is booked without an operator, ES Promotions asks that the client provide their own responsible adult to supervise. Children should not be left to use this equipment unsupervised.	2	1	2	None
Unruly Behaviour	The most important rule of all is that the operator's decision is final, refusal to abide by the operators guidance will result in ride refusal& in extreme circumstances closure of the game.	1	2	2	Please enforce this rule with your own supervisor if an ES operator is not attending.
Injury from falling over.	The hop scotch should always take place on a flat surface. Players should race at their own pace and not to over exert themselves.	1	2	2	We also advise that children with existing medical conditions that may be aggravated by this game do not take part.
Injury from collisions with other participants or spectators	Only one player should be on the hop scotch at any one time.	2	2	4	Please enforce this rule with your own supervisor if an ES operator is not attending.

L=Likelihood S=Severity L X S = Risk Score with 1 = Lowest Risk and 25 = Highest

Risk and likelihood are worked out using numbers 1-5. These are then multiplied to give the risk score. We recommend that clients undertake their own risk assessment to suit individual needs.

We strive to have no risk score over 10 and anything over 20 would result in ES Promotions not running the kit.
