

ES PROMOTIONS RISK ASSESSMENT

Risk Assessment of: Popcorn Machine/Cart

Risk	Existing Controls	Likelihood 1 - 5	Severity 1 - 5	Risk Score L x S	Further Action to Take
Electrocution	Electrical units are visually inspected for obvious faults. All equipment is PAT tested once a year, cables are covered and only trained and insured staff should have access.	1	3	3	If sockets are used at the venue, we ask the client to check these prior to event.
Risk of slipping on spilt ingredients and sustaining an injury	Have a bin for spilt ingredients close by. Operator to clean up any spillages immediately.	1	1	1	Operator to make regular checks to ensure area is clear and clean.
Risk of infection from food.	Basic food hygiene Rules abided by	1	2	2	Ensure operator regularly washes hands.
Risk of customer injury from tripping on cables.	Cables covered and secured.	1	3	3	All cables to be covered.
Risk of equipment tipping over or collapsing onto customer or operator	Carts aren't to be over-loaded. Carts will be bolted and pinned together securely.	1	2	2	If event is busy, operator will manage queue and ensure guests aren't too close to the machine.
Burns	Trained operator to use machine only. Corn / oil to be added when machine is turned off. Guests are not to touch machine at all.	1	3	3	If event is busy, operator will manage queue and ensure guests aren't too close to the machine.

L=Likelihood S=Severity L X S = Risk Score with 1 = Lowest Risk and 25 = Highest

Risk and likelihood are worked out using numbers 1-5. These are then multiplied to give the risk score. ES Promotions recommend that clients undertake their own risk assessment to suit individual needs.

We strive to have no risk score over 10 and anything over 20 would result in ES Promotions not running the kit.
