

## ES PROMOTIONS RISK ASSESSMENT

**Risk Assessment of: Sack Race**

Risk	Existing Controls	Likelihood 1 - 5	Severity 1 – 5	Risk Score L x S	Further Action to Take
Over Enthusiastic Participants	If the sack race is booked without an operator, ES Promotions advises that the client provide their own responsible adult to supervise. Players should not be left to use this equipment unsupervised.	2	1	2	None
Unruly Behaviour	The most important rule of all is that the operator's decision is final, refusal to abide by the operators guidance will result in ride refusal& in extreme circumstances closure of the game.	1	2	2	Please enforce this rule with your own supervisor if an ES operator is not attending.
Injury from falling over/ tripping over the sack etc	The sack race should always take place on a flat surface. Players should race at their own pace and not to over exert themselves.	3	2	6	We also advise that players with existing medical conditions that may be aggravated by this game do not take part.
Injury from collisions with other participants or spectators	A designated area should be set aside for the game safely away from spectators. Players should keep a safe distance away from each other also.	2	3	6	Please enforce this rule with your own supervisor if an ES operator is not attending.
Injury from fallen player being jumped on by continuing player.	Players should show consideration for other contestants.	1	4	4	Please enforce this rule with your own supervisor if an ES operator is not attending.
Danger of unnecessary Injury	Ensure that no one uses the equipment who suffers from neck or back problems, heart complaints, is feeling unwell, suffering effects of alcohol of drugs or pregnant.	1	5	5	Players with the listed conditions who still wish to play <u>do so at their own risk</u> . However the operator has the right to refuse service to anyone they deem as a safety threat.

L=Likelihood S=Severity L X S = Risk Score with 1 = Lowest Risk and 25 = Highest

Risk and likelihood are worked out using numbers 1-5. These are then multiplied to give the risk score. We recommend that clients undertake their own risk assessment to suit individual needs.

We strive to have no risk score over 10 and anything over 20 would result in ES Promotions not running the kit.
